Information for Students

The HIBB offers counseling for students and trainees interested in internships in other countries. The EU program “Erasmus+” paves the way for internships, lasting from two weeks to twelve month, for trainees, by providing scholarships.

The mobility agency of “Arbeit und Leben Hamburg” (AL-HH) supports the trainees applying for an Erasmus + grant and helps them to organize their internship abroad. Three options are given:

- ALHH organizes group flows: Dates and places are chosen, the placement, accommodation and program will be provided by AL-HH
- The school organizes a group flow
- Individual planning: AL-HH will provide the grant and the rest will have to be organized by the trainee

Besides “Erasmus+” there are quite a few other support and funding programmes, applicable according to desired country and period. “Arbeit und Leben” also gives advice concerning stays in other countries after completion of vocational education and training courses.

You can also find more information on other grants here:

Information for Teachers and Instructors

Vocational further education teachers and instructors may spend time in foreign countries (ranging from two days to two weeks), too. Information can be obtained from the HIBB or AL-HH.
